Using a number of types of fabrics in space will give a very rich and interesting look, the use of Fabrics and textiles will come in the form of : maps, runner maps, curtains, pillows, pictures ,fabric combinations on sofas and more

"It's just daring to get the inspiration from everything going on around you! Look at the inquisitive curiosity about the world, just like a kid, that's what I do. You can find inspiration for almost anything, in a beautiful postcard, in a funny envelope arrived in the mail, in the wintry weather on a cool morning or in an old shoe.

Don't think so much, just try to connect with emotion and then give it a translation

In material, color and shape. Here's how you go about designing your home. "-
Sir Paul Smith

Those word have been said by one of the most known designers.

What does it mean? Follow your feelings, try to design from your heart and then work from your brain, the most outstanding design in the world are the one that creat a certain feeling within us as a human beeings

The brownish design gives us a calmer feel in the space, Combinations of natural rattan with touches of off-white fabric. All of this complexity gives us a relaxed and natural feel
When designing our space at home or elsewhere, only 3 shades are recommended, while the fourth shade will be space-sensitive.

- 50% color that comes from the flooring itself
- 40% tint that comes from the wall itself
- 5% shade resulting from its furniture and shades
- And 5% shades that result from the textile in the space itself

Clean architectural design - The use of textiles gives a color touch to space and in fact it revives him. An ethnic rug combined with a High teck touch in the space create something very unique in the design it self . The niche in the wall which is the result of unique thinking combined with special wall cladding. I personally recommend incorporating wood cladding on the wall because it gives a special point of interest to the space itself.

In this space we can see a very subdued space in its appearance. A very solid style with a different touch that comes through a burgundy armchair with nickel shades of metal. A cold office ceiling that gives contrast to the space itself.

Combinations from nature give us a calm and soft look. It is very important to design such interlocking in our living space. Precisely because our home is where we must recharge and relax. As we can see, there is a delicate and soft combination of rattan material here. With off white fabric seat - and cushions that are not tinted but do a nice job in the combinations themselves.

Through the technology innovations implemented in the curtain we can fully control

In shading the room. We can also seal or open and illuminate the grooves between the stages.

San Strip Curtain made of plastic and effective to give a solid appearance with convenient use for wet rooms, it is built in such a way that the sealed part is on the transparent part and this is the reason the sun can be dimmed

A silhouette curtain is like a decorative fabric blinds
Silhouette curtain is made of three layers combined with airy and cozy tulle fabric in the center
The curtain has a variety of patterns. A silhouette curtain was gathered up, on the tracks
There is a covered with cloth under which the curtain is gathered.
Silhouette curtain gives
Soft and cozy atmosphere and fits any style of design.

Now let's talk about accessories and decorative textiles in our private home design

Decoration is an important and integral part of our space design.

It is our ability to combine items that will enhance the space due to their minimalistic presence. However, in this place you can definitely combine items that are not rather related to the design style that been chosen. Why incorporate something unrelated? Quite simply, one element not related to the design style can give a different and unique design touch.

However, it is not advisable to place anything unrelated - but to connect with the essence and style of the space and give it a special touch.

How do you do that ? Look at the style itself and see what can make it stand out and give it some design sting

The space here is divided into 2 viewing directions. On one side, the living room is connected in its design language with white sitting chair (called shez long)with golden brown touches, and there is the living room lamp in golden shade as well. In the other room there is a kind of disorder, because the textile does not communicate with any part of the room itself. While there are interesting elements in the furniture itself, such as the desk, but besides that there is a disorder which is quite prominent

Pillows are an integral part of the textile. Nowadays you can get a variety of fabrics, shades and very special ones. The place of plain fabrics no longer exists, and you can order fabrics with special prints and personal photos of you or your loved ones .

There is a trend nowadays to incorporate a large number of cushions on the sofa with a view of indulgent comfort - and I can say from experience that it certainly gives such a look, yet not everyone will connect with it.

You have to watch out for trends by just being up to date!

It is important that you stay true to yourself and your design style throughout - do not forget that you pay money on your home, no matter if you bought it or rent it - you should live it according to all your requirements and expectations
